

SITE NUMBER: K96

NAME: Garden Ground to South East of 'Downfield', Cookney

**Assessment undertaken by: Sarah MacRitchie**

**Proposer: Mr Graeme Rodger**

**Nature of the proposal: Residential: 1 unit**

**Recommendation:** Possible

**Reasoned justification:<sup>1</sup> The site has no constraints. The site scores -2 on the GAM. The site scores 0 in the SEA.**

The site is adjacent to the settlement boundary. Cookney was not identified in the initial settlement approach as requiring a site allocation or flexible provision of plots. There is currently an allocation in Cookney which is undeveloped.

The site is adjacent to existing development, and has no constraints so the site is possible.

<sup>1</sup> Reasoned Justification

Why should this site be considered or dismissed in the Local Development Plan? Please ensure you cover issues relating to the preferred settlement strategy as part of this justification, particularly where you are making a "Preferred" recommendation. Please also embed (copy and paste from GGP) any suggestion you might wish to make regarding allocating only part of the site, or on phasing.

Please see the spreadsheet "Target housing and employment allocations.xls" for guidance on the indicative scale of allocations to be sought in each area (Use the TRIM search facility to find this). For each of the 8 areas a report on settlement strategy options will have to be prepared that outlines the principles and options that have been considered. I believe that this is an iterative process which starts with the "targets" as modified first by availability of sites and our technical evaluation, and thereafter by the views of members as to what they wish to achieve. I have started that report.

Please maintain a record of your progress in "Spreadsheet to record progress on completing bid assessments Jan 2009.xls".

Modification of the reasoned justification will be undertaken to reflect the desired settlement strategy following the Member seminars in March 2009 and for the final draft of the main issues report in May, when the sheets will form part of the evidence base for the main issues "proposals" maps ( published separately as a technical appendix.
